GERMANY**

Toaster merido⁵ selected design

Details

- elongated slot toaster for 2 slices of toast
- thermal insulated housing with glass panels
- integrated bread and roll rack
- memory function of the toasting degree
- toasting degree with LED indication
- automatic toast food centering
- defrosting function
- reheating function
- automatic switch-off function when toast is jammed
- separate stop button to interrupt toasting
- crumb tray
- warranty: 2 years*
- product made in Germany

Technical features

- 220-240 Volt, 850-1.000 Watt
- TÜV-Rheinland / GS, safety category 1, CE
- width 38.5 cm height 20.0 cm depth 9.0 cm
- weight: 3.0 kg

Item No. / GTIN

black: 630.044 / 40 04822 63044 1
white: 630.045 / 40 04822 63045 8
red: 630.046 / 40 04822 63046 5

PU / PU-GTIN

black: 2 / 40 04822 00109 8
white: 2 / 40 04822 00110 4
red: 2 / 40 04822 00111 1

*The 2-year manufacturer's warranty applies to all devices sold within the European Union. Your legal warranty claims according to § 437 ff. BGB (German Civil Code) remain unaffected by this regulation. You can view the warranty conditions at <https://www.ritterwerk.de/warranty>.

Toaster merido⁵ probably the slimmest toaster in the world

With a depth of shortly 9 cm, the elegant merido⁵ elongated slot toaster is incomparably slim-line and a real eye-catcher in any kitchen. The high-quality glass panels in black, white or red also gives the toaster an exclusive appearance. High-quality materials and perfect craftsmanship guarantee that the merido⁵ will have a long life span.

With merido⁵, two slices of toast can be toasted at the same time, with the toast food centering device ensuring that they are evenly browned. There are nine toasting degrees to brown the bread to your taste. The toasting degree is digitally displayed in LEDs and is retained for next time by means of a memory function so it does not always need resetting – this is also the case if the toaster is disconnected from the main supply. While the bread is toasting, the LEDs gradually disappear as the time progresses, so that the remaining time to toast can be easily predicted.

The toaster has other useful functions: If toast is not served immediately, it can easily be reheated in 30 seconds using the rewarming function without having to toast it again, therefore avoiding a darker shade of toast. Frozen slices of bread are no problem for merido⁵ either, with its separate thawing function, it first thaws the bread and then toasts it in a single step.

With the integrated bread and roll rack you can freshly crisp up bread rolls and croissants. As the bread and roll rack is integrated into the toaster, it does not have to be stored separately and as such inadvertently lost.

Its perfectly and inconspicuously integrated crumb tray has an elegant design and can be quickly and easily removed for cleaning.

merido⁵ has many practical functions and also guarantees completely safe toasting: The thermal insulation prevents excessive heat in the external housing, protecting users from burns. The toaster is fully and automatically switched off after the bread has been toasted to the pre-set level – this is also the case if the bread gets stuck. If necessary, the toasting cycle can be interrupted at any point with a separate stop button. The illuminated LED display also ensures more safety because it visually shows that the toaster is in use.

Together with the energy-saving cavita⁵ kettle and the elegant pilona⁵ coffee machine, the perfectly coordinated breakfast set is complete - naturally "made in Germany".
